Teamster has built up technical expertise which is unique in the field, and today is Estonian leading supplier of custom-made soldering pallets and masks.

Teamster is geared for flexibility. The company and its production system are adapted to the requirements of the market to allow for a quick reaction to the customer's desires, rapid reconfiguration of the production process and swift delivery of the finished products.

Teamster offers cost efficient and fast solutions for the design and production of printed circuit board (PCB) assembly tooling.
