InLine tester ILT 001

The ILT 001 test platform with interchangeable product-based test modules is suitable for testing small and medium-volume production and is compatible with a standardized production line. The easily and quickly reconfigurable test platform enables both one and two side testing. The width of the conveyor is conveniently adjustable and measurable. Product codes can be scanned from both top and bottom.

TECHNICAL DATA

Min PCB size : 50 x 50 mm

Max PCB size : 350 x 390 mm

PCB top side componente max height : 40 mm

Board max weight : 4 Kg

Direction of board travel : Left to Right

Input voltage : 115V AC / 230V AC

Dimensions : 955 x 896 x 1448 mm

Conveyor height : 900 – 985 mm

No vacuum required

SMEMA compatibility
