MCD Elektronik GmbH Hoheneichstr. 52 – 75217 Birkenfeld Tel. +49-7231 78405-0 – Fax: +49-7231 78405-10 Managing Director: Dr. Thomas Däubler	Ausgabedatum: ab 04.11.2025	Seite 1 von 2	
	Dokumentenversion: V1.0	Bearbeitet von: AES	Kurztitel:
Markt&Technik, Ausgabe 45	Rückfragen an: Anja Erler-Szegedi anja.erler-szegedi@mcd-elektronik.de		

Automation meets measurement technology expertise

MCD Elektronik GmbH develops highly automated test systems that are integrated into production lines worldwide, particularly in the electronics and automotive industries. Increasing demands on quality, cycle times, and process reliability require solutions that operate reliably around the clock. MCD responds to this with modular, scalable systems that can be tailored precisely to customer-specific requirements.

As a comprehensive solution provider, MCD offers innovative measurement and testing technology as well as comprehensive services—from planning and integration to commissioning and long-term support. Depending on the project, the company acts as a general contractor or as a partner within existing structures. Thanks to an international network of partners, even complex projects can be implemented entirely from a single source.

Practical examples demonstrate the broad spectrum: an inline test system for truck antennas in Asia with four automated stations and a cycle time of 30 seconds; an 8-station test line with ITAC connection in cooperation with Schiller Automation; and a project with Wolf Produktionssysteme in which MCD sensors are calibrated using intelligent software algorithms and manufacturing tolerances are compensated.

With locations in Germany, Hungary and China, MCD ensures a global presence and proximity to its customers. The company supports its customers throughout the entire life cycle of a test system—from the concept phase to design and software development to training, documentation, and after-sales support.

About MCD Elektronik GmbH:

MCD was founded in 1983 and supplies complex testing and automation technology worldwide. The systems are used by both well-known corporations and medium-sized companies for the production and testing of electronic and mechatronic assemblies.

MCD Elektronik at the *productronica*, Hall A1, Booth 155
