

Plan Optik joins C2MI Network

Plan Optik AG, the leading manufacturer of wafers from glass and quartz for Semiconductor and MEMS applications, is proud to announce its collaboration with the Centre de Collaboration MiQro Innovation (C2MI) in Bromont, Canada.

After successfully working with C2MI and members of their company network in the past years Plan Optik AG will from now on also participate in C2MI network activities. Joining this network will enable Plan Optik to share their experience and Know-how to members, partners and companies beyond. As a member Plan Optik will provide manufacturing service for other members, partners and other companies in order to thrive innovations and decrease the time from prototype to product manufacturing of new technologies.

About C2MI:

„The C2MI is an international beacon in advanced packaging and microsystems. As a Centre of Excellence, its goal is to allow its members to foster the growth of the microelectronics industry through the accelerated commercialization of market-driven prototypes. Active and seamless collaboration and synergy among the Center’s members enables the rapid commercialization of next-generation prototypes.“ (from C2MI Homepage)
