Konrad Technologies Opens New Manufacturing Facility in Villingen-Schwenningen

Konrad Technologies expands in Germany with over 2,000 square meters dedicated to metal fabrication.

VILLINGEN-SCHWENNINGEN, Germany - November 8, 2019 - Konrad Technologies today announced the opening of a new manufacturing facility in Villingen-Schwenningen, Germany.

The new facility in Villingen-Schwenningen manufactures frame structures. The dedicated 2,000+ square meter facility enables Konrad Technologies to reduce the overall manufacturing time of final products. The new site employs nine highly knowledgeable and experienced employees and will continue hiring.

Michael Konrad Chief Executive of Konrad Technologies, said:

"The Villingen-Schwenningen manufacturing facility will conduct our metal work throughout the cutting, bending and assembling processes. We can now efficiently produce the metal frames for our test systems in-house. This strategic investment enables us to deliver customer-specific test systems faster than ever before."

Konrad Technologies is the provider of value added, platform based automated test solutions used to solve the world´s most complex engineering challenges.
