

You're invited

To Members of the Media:

It is our pleasure to invite you to visit PVA in Hall A2, Stand 253 at productronica 2025 to see live demonstrations of the latest technologies in the dispensing and coating world.

Come say hello to **Rod Kasperson**, vice-president of global sales, **Pieter Van Der Vorst**, regional sales manager, Europe, and **Christian Lubascher**, regional sales manager, Europe.

Also in attendance will be **Kimberly Fagan-Riley**, marketing communications manager; **Paul Kim**, regional sales manager, Asia Pacific; **Jon Urquhart**, director of applications engineering; and applications engineers **Krzysztof Kin** and **Volodymyr Pivnenko**.

PVA will feature **live demonstrations** of its gold-standard dispensing technology:

- Global bestseller **Delta 8** 4-axis RTV staking machine with fiducial camera, FC100-MC front-closing dispense valve, on view with the intuitive, state-of-the-art software **PathMaster X**
- Delta 8 3-axis machine with DX150 and PMX
- **Endurance Cart** with **SGP** Servo Precision Gear Pump for meter mix dispensing
- Redesigned **Delta 6** 3-axis conformal coating machine equipped with FC100-CFR, FC100, fiducial camera, needle calibration, auto solvent and refill station; PathMaster X programming software
- Valve Kiosk Stand with an array of 18 dispensing valves from PVA's extensive product line

Discover...

- The hands-on **ease of programming** and application for electronics manufacturers who care about precision dispensing and safety.
- A model for increasing manufacturing **performance and efficiency**.

Whether you need **background or on-the-record comments**, Rod, Pieter, Christian, Kimberly and the PVA team can speak with you about...

- **Trends** in custom automation and manufacturing
- The latest **innovations** in automatic dispensing, coating and TIM solutions

Founded in 1992, **PVA** is a \$70 million privately owned company that has grown into a global enterprise, epitomizing “the gold standard” within the dispensing and coating industry.

PVA's precision equipment is used worldwide in electronics manufacture and in industries ranging from automotive, EV and e-mobility; solar; semiconductor packaging; printed circuit board assembly; aerospace and defense; medical device manufacturing; and consumer electronics.

Visit **PVA in Hall A2, Stand 253** at Messe München Fairgrounds in Munich, November 18 – 21, 2025. We'll be glad to see you!

Best wishes,

Christi Cassidy
